## EDUCATION

**Arizona State University** - Master of Science in Data Science, Analytics and Engineering Aug 2024 – Dec 2025  
**Coursework:** Data Processing at a Scale, Cloud Computing, Statistical Machine Learning, Statistics **GPA: 3.78/4**  
for Data Analysts, Data Mining, Information Assurance and Security

**BITS Pilani** - Bachelor of Engineering in Computer Science Oct 2020 - Jun 2024  
**Coursework:** Object Oriented Programming, Operating Systems, Data Structures and Algorithms,  
Compiler Construction, Foundations of Data Science, Database Systems, Deep Learning

## EXPERIENCE

- **CVS Health-Aetna Tech** May 2025-Aug 2025  
Incoming Software Engineering Intern Scottsdale, AZ
- **W.P. Carey School of Business, Arizona State University** Jan 2025 - May 2025  
Data Science Research Aide Tempe, AZ
  - Identified key drivers of university innovation by analyzing **250+ universities' interdisciplinary data**, revealing emerging **trends** and **correlations** in institutional research impact.
  - Developed an **end-to-end data analysis pipeline** using **Python(NumPy)**, streamlining data integration, processing, and visualization, **reducing analysis time by 90%**.
  - Applied exploratory ML techniques to detect innovation trends, **improving insight generation efficiency by 80%**.
- **Dell Technologies** Jul 2023 - Dec 2023  
Software Engineering Intern Bengaluru, IN
  - Automated **data management** processes by **designing and developing a MongoDB database** with **advanced XML parsing and serialization in C#**, reducing manual data handling by **90%**.
  - Improved data processing efficiency by **optimizing XML data extraction and integration workflows**, streamlining serialization for the EIPT team.
  - Enhanced **customer support efficiency** by developing an **NLP-based email classifier and chatbot** using **NLTK, scikit-learn, and TextBlob**, achieving **91% classification accuracy**.
  - **Validated business impact** by showcasing the chatbot solution to **senior leadership at a hackathon**, where it was **shortlisted for further development** and potential integration into **Dell's internal tools**.
- **Red Cross Society** Jul 2022 - Aug 2022  
Software Engineering Intern Bengaluru, IN
  - Improved **data integrity** and retrieval speed by developing a scalable **Django (Python) and MySQL backend**, replacing manual Excel-based processes, **reducing data retrieval time by 40%** and **eliminating 90%** of manual entry errors for college registration and fee tracking.

## PROJECTS

- **Full Stack-Learning Management System(GitHub)**  
Tools: React, Node.js, Express, AWS RDS, Stripe API, Vimeo API
  - Developed a **full-stack Learning Management System (LMS)** with **user authentication, course management, and progress tracking**, designed for scalability and real-world deployment.
  - Optimized system performance by architecting **RESTful APIs in Node.js and Express**, improving **data retrieval speed by 40%** and ensuring seamless third-party integrations with Stripe (payments) and Vimeo (video content).
  - Engineered a scalable backend on **AWS RDS**, tested with **50+ simulated users**, ensuring smooth performance for **high-concurrency scenarios**.
- **Traitlytics- Linkedin Personality Detector(GitHub)**  
Tools: Ollama(LLM), python, Selenium, Flask
  - Developed an **AI-driven personality prediction tool** that analyzed over **500 LinkedIn profiles**, resulting in a **75% accuracy** rate in DISC assessments by integrating LLMs via **Ollama** and automated web scraping techniques.
  - Enhanced **user engagement by 60%** through the implementation of personalized and actionable personality insights, achieved by leveraging advanced machine learning algorithms and real-time data analysis.

## TECHNICAL SKILLS

- **Programming Languages:** C/C++, Python, Java, HTML/CSS, Javascript, Dart, C#, .NET, SQL
- **Toolkits:** Docker, Linux, Git, Tableau, Postman, JUnit, Tensorflow, Hadoop, Spark, Keras, MS Excel, Matplotlib
- **Cloud Technologies/Databases:** AWS, MySQL, MongoDB, PostgreSQL, GraphQL, DynamoDB
- **Frameworks :** PyTorch, Tensorflow-Keras, PyTorch-Forecasting, scikit-learn, Pandas, SciPy, XGBoost, NumPy
- **Data Science and ML:** Time Series Forecasting, RAG, NLP, A/B Testing, Reinforcement Learning
